

ArborTie Kit

Application:

- Tree staking and guying

ArborTie Kit:

The ArborTie® Professional Anchoring Kit is an ideal method for securing trees in high wind areas or for any trees that need additional support. Our tough Steel Eye Stakes are easy to install, perfect for most soil conditions and can be used multiple times. By combining the strength and convenience of steel with our industry leading ArborTie staking and guying material we created the ultimate light duty anchoring kit.

Features:

- 400 kg test strength ArborTie: never damages bark
- Steel eye stakes: re-usable, ideal for rocky soils
- Economical: low cost method to protect investment in trees
- Easy installation: no drive rods required

Material:

Stakes: steel

ArborTie: flat woven polypropylene material

Packaging/measures:

1 ArborTie Kit consists of:

3 black stakes with a length of 37 cm and the eye has a diameter of 2,5 cm

3 rolls ArborTie (olive green) with a length of 3 m and 1,9 cm wide

The ArborTie kits are individually packaged.
