

TreeProtect®

Tree Trunk Protector

TreeProtect® is a cheap, effective and a reliable solution to protect trees against mowing damage and rodents. The tree trunk protector is available in the colours brown and green.

TreeProtect® has optimal air gaps. Therefore the tree gets enough air and light. Infracture by insects and rot of the tree bark is prevented by the air gaps.

TreeProtect® protects trunks to a diameter of 11 cm. For larger trees two or more TreeProtect® trunk protectors can easily be linked together.

Material

TreeProtect:

- Polyethylene (PE), 100% recyclable
- Colour: (dark-)green (TP-G) and brown (TP-B)
- High-quality FDA certified recyclable plastics
- Easy to install

- High-quality FDA certified recyclable plastics
- Easy to install
- UV proof
- Optimal aeration holes

Dimensions

	Type	Height	Width	Thickness
	TP-B	21 cm	36 cm	2 mm
	TP-G	21 cm	36 cm	2 mm
	TP-BIO N	21 cm	36 cm	2 mm
	TP-BIO G	21 cm	36 cm	2 mm

NL Greenlabel A+

Royal Haskoning DHV has developed a method, for NL GreenLabel, that gives a view into the integral sustainability score of a product, material, plant or area. This score is translated into a label and displayed in a sustainability passport.
